*Research. Development. Support. Advocacy.*

## Functional Neurology

Functional Neurology is based in the fact that areas of our brains are connected to specific parts of our bodies. The brain controls the body and the body gives feedback to your brain. This relationship is crucial to our health. Disturbances of the physiology in the nervous system, specifically the brain, can have detrimental effects on the body. Through functional Neurology, certain groups of damaged neurons can be affected by various stimuli, thereby reducing the damage done and, in some cases, reversing it entirely.

Functional Neurologists use various specially designed therapies to repair this relationship damaged by an individual's injury and improve the performance of you your brain and nervous system.

CTE Hope has worked with several Functional Neurologists and have seen tremendous improvements. However, not every Functional Neurologist specializes in brain injury and concussions, so please do your research and contact us to ensure you are seeing the right professional. Below is a list of Functional Neurologists throughout the US whom we would recommend.\*

For more information on Functional Neurology, please visit our Treatment and Management page of our website at [www.ctehope.com](http://www.ctehope.com).

\*The below list of Functional Neurologists was compiled with the help of Dr. Jeremy Schmoe and Faces of TBI.

This is a medical Disclaimer for CTE Hope. The information you will find on our media sources and in our presentation and literature are for educational purposes to help create a support system for people involved with TBIs and CTE. Any advice or suggestions found on our media sources, and in our presentations and literature are not intended to be medical diagnosis, create a treatment plan, or manage your specific complaints and/or signs and symptoms. If you would like to contact our Medical Research and Development Team, please send an email to: [info@cte-hope.org](mailto:info@cte-hope.org)
